WHO WE ARE ?

Innovative Education : Online and Offline

Winstud is on the threshold of a tremendous transformation in its operations in spreading quality technical education on a global level. We believe that knowledge is the basis of progress and innovation in the field escalates its profoundness and effectiveness.

Winstud, an ISO 9001-2008 certified Educational institution designs, develops, conducts and certifies high profile courses with international recognition delivered through online and off line modes. We promise the students brilliant careers through induction into our prestigious courses. Established in 2014, Winstud is a private limited company registered under Govt. of India for spreading quality education through courses which are not only meant to prepare the job-seekers but also to instill confidence and capabilities of entrepreneurship in students. Hence, Vocational courses designed by Winstud cuts an edge over the similar courses in the educational field.

The curriculum plans of all courses conform to the latest requirements and competencies in the employment sector of the modern age. Our courses deal with Management, Education, Fashion Designing, Interior Designing, Architecture and Engineering, Health and Beauty, IT, Accounting etc. and are implemented through 100 + centers enrolling more than 15000 candidates. Persons who cannot attend regular courses through learning centers can learn our thorough online courses with equal value and acceptability.

Winstud allots franchisee to learning centers for conducting the prestigious courses designed by us and certified by authentic and renowned accreditation and certification institutions in the educational field. The high accreditation status of the certificates enhances the employability and job prospects of students. What we aim is to equip the students with talent, efficiency and competency to face any challenge in the employment sector. Numerous students who have successfully completed our courses are placed in high positions in many countries. Certifications of Winstud Courses by institutions of international repute lend a cutting edge to win a prosperous professional life. Our web-based online certificate verification system(OCVS) allows verification the authenticity of certificates.

EARLY CHILDHOOD EDUCATION

Early years of life is a critical period in the formation of intelligence and character of an individual. Children are born with immense physical and mental capacities which allow them to grow into mature human beings. If the hidden potential are not recognized and supported by a proper physical and psychosocial environment, they will never be developed. Proper care in the early years of life by a good Early Childhood Care and Education (ECCE) professional can do a lot in the optimum development of a human being. The ECCE course from FICS will enable passionate teacher students to create an enabling environment for children from birth to six years of age. The course curriculum will cover topics concerning children's health, nutrition, psycho-social and cognitive development. The diploma will give a strong theoretical foundation of different learning theories and their application in an early childhood care and education setting.

We invite all the earnest students to learn the courses designed by Winstud Academy and enjoy the privilege of gaining a cutting edge in the highly competitive job market. Join a course of Winstud Academy and win a prosperous professional life.

"Educate others on pollution prevention..."

Our Commitment to a Sustainable Future

At Winstud Academy, we recognize the urgent need to address environmental challenges and are committed to promoting sustainability. Our new "Sustainable Future Edition" brochure reflects this commitment by highlighting the critical issue of pollution in all its forms—air, water, soil, and noise.

Pollution affects every aspect of our lives and the planet's health. Air pollution compromises the air we breathe, leading to respiratory illnesses and climate change. Water pollution contaminates our rivers and oceans, harming marine life and disrupting ecosystems. Soil pollution reduces agricultural productivity and food security. Noise pollution affects mental and physical well-being, disturbing the natural balance.

Winstud Academy is dedicated to educating and empowering our students to be agents of change. We believe that through awareness, education, and action, we can make a significant difference. Our curriculum includes comprehensive environmental studies, promoting sustainable practices, and encouraging community involvement in pollution prevention.

We are committed to reducing our ecological footprint by implementing green practices within our institution. This includes waste reduction, energy conservation, and supporting eco-friendly initiatives.

Together, we can create a cleaner, healthier, and more sustainable future. Join us in our mission to protect and preserve our planet for generations to come. At Winstud Academy, we are not just teaching sustainability; we are living it.
